Be it enacted by the Town Board of the Town of Bethel as follows:

Article I. General Provisions

Section 1.1. Authority for Adoption

The Town Board hereby adopts this Local Law pursuant to the authority described at Section 1. of Appendix A attached hereto, which Appendix A is hereby incorporated and made a part of this Local Law for all purposes by this reference.

Section 1.2. Findings of Fact

The Town Board has heretofore made certain findings, determinations, and declarations relative to the matters set forth in this Local Law, and a copy of the text of such findings, determinations, and declarations is set forth at Section 2. of Appendix A attached hereto.

Section 1.3. Purpose & Intent

The Purposes and Legislative Intent underlying the Town Board’s passage of this Local Law are set forth at Section 3. of Appendix A attached hereto.

Section 1.4. Definition of “Existing Zoning Law,” this “Local Law,” and “this “Law”

As used in this Local Law, the term “Existing Zoning Law” shall mean and be the Zoning Law of the Town of Bethel dated June 24, 2009 (Local Law No. 1 of 2009), as amended by: (i) Local Law No. 1 of 2010, adopted February 10, 2010; (ii) Local Law No. 2 of 2010, adopted April 14, 2010, and (iii) Local Law No. 1 of 2011, adopted March 24, 2011, as any of the foregoing may have heretofore been amended or supplemented.
As used herein, the term this “Local Law” shall mean and be this Local Law No. 1 of 2012.

As used in Article II of this Local Law, the term “this Law,” “this Chapter,” and “herein” shall mean, be, and refer to the Existing Zoning Law as amended by this Local Law.

Section 1.5. Interpretation

The statements of purpose, intent and findings are legislatively adopted along with the formal text of the amendments to the Existing Zoning Law effected by this Local Law. They are intended as a legal guide to the administration and interpretation of this Local Law and shall be treated as legislative history.

Article II. Amendments of Existing Zoning Law

2.1. Amendments of §345-1 of the Existing Zoning Law

§345-1 of the Existing Zoning Law is hereby amended so as to change the Title of such §345-1 from "Scope." To “Scope; Severability.”, and to add the following text as a new second paragraph:

“If any word, phrase, sentence, part, section, subsection, or other portion of this Chapter, or the application thereof to any person or to any circumstance, is adjudged or declared invalid or unenforceable by a court or other tribunal of competent jurisdiction, then, and in such event, such judgment or declaration shall be confined in its interpretation and operation only to the provision of this Law that is directly involved in the controversy in which such judgment or declaration is rendered, and such judgment or declaration of invalidity or unenforceability shall not affect or impair the validity or enforceability of the remainder of this Chapter or the application hereof to any other persons or circumstances. If necessary as to such person or circumstances, such invalid or unenforceable provision shall be and be deemed severed herefrom, and the Town Board hereby declares that it would have enacted this Chapter, or the remainder thereof, even if, as to particular provisions and persons or circumstances, a portion hereof is severed or declared invalid or unenforceable.”

2.2. Amendments of §345-5 of the Existing Zoning Law

§345-5 of the Existing Zoning Law is hereby amended so as to delete the text of the present definition of “COMPREHENSIVE PLAN” in its entirety, and to replace the same with the following text:
“The Comprehensive Plan adopted by the Town Board of the Town of Bethel for the future preservation and development of the Town pursuant to §272-a of the New York State Town Law, as the same may from time to time be amended, updated, and supplemented, including without limitation by planning policy statements, goals, and standards adopted by the Town Board.”

§345-5 of the Existing Zoning Law is hereby further amended so as to add the following definition of “Enclosed Structure,” as follows:

Enclosed Structure – a building with a floor, walls and a roof all made of impervious materials, providing structural support and designed to prevent the release of Contamination resulting from any of the activities conducted or materials stored within.

§345-5 of the Existing Zoning Law is hereby further amended so as to delete the text of the present definition of “Gambling” in its entirety.

§345-5 of the Existing Zoning Law is hereby further amended so as to delete the text of the present definition of “Light Industrial Use” in its entirety, and to replace the same with the following text:

LIGHT INDUSTRIAL USE OR LIGHT INDUSTRY --- A business premises engaged in the fabrication of finished products or parts, predominantly from previously prepared materials, including processing, assembly, treatment, packaging, and incidental storage, sales, and distribution of such products, but excluding Manufacturing Use as defined in this §345-5, and excluding any Explicitly Prohibited Use, as defined at §345-38.

§345-5 of the Existing Zoning Law is hereby further amended so as to delete the text of the present definition of “Manufacturing” in its entirety, and to replace the same with the following text:

MANUFACTURING or MANUFACTURING USE --- A business premises engaged in the mechanical or chemical transformation of materials or substances into new products, including the assembling of component parts, and the creation of products, but excluding any Explicitly Prohibited Use, as defined at §345-38.

§345-5 of the Existing Zoning Law is hereby further amended so as to add the following text to the present definition of "MINING," said text to be inserted immediately following the end of the sentence that begins “Mining shall not include...”:

“In no event shall ‘mining’ be construed to mean, be, or include Natural Gas And/Or Petroleum Exploration Activities or Natural Gas And/Or..."
Petroleum Extraction Activities (as those terms are defined at §345-38 of this Chapter).”

§345-5 of the Existing Zoning Law is hereby further amended so as to delete the text of the present definition of “SPECIAL USE” in its entirety, and to replace the same with the following text:

“A use which because of its unique characteristics requires individual consideration through a procedure of review by the Planning Board applying the standards and criteria of §345-30 of this Chapter, in order to determine whether a special use permit should be granted, conditionally granted, or denied.”

§345-5 of the Existing Zoning Law is hereby further amended so as to add the following definitions of “Variance,” “Variance, Area,” and “Variance, Use,” as follows:

“VARIANCE
An area variance or a use variance, as the context may admit.

VARIANCE, AREA
The authorization by the Zoning Board of Appeals for the use of land in a manner that is not allowed by the dimensional or physical requirements of the applicable zoning regulations.

VARIANCE, USE
The authorization by the Zoning Board of Appeals for the use of land for a purpose that is otherwise not allowed or is prohibited by the applicable zoning regulations.”

§345-5 of the Existing Zoning Law is hereby further amended so as to add the following definition of “Contamination,” as follows:

“Contamination” means any hazardous substance, toxic material, or other substance, chemical or waste, emission, discharge or pollutant or comparable material (hereafter, a “pollutant”) listed, identified or regulated pursuant to any applicable federal, state or local laws, statutes, ordinances rules or regulations and other requirements of governmental authorities relating to the environment, natural resources, or human health and safety, which has been released into the environment. Contamination includes the release of any substance for which any governmental authority has provided a waiver or exemption to any potential discharger or class of dischargers, and but for that waiver or exemption the substance would be a pollutant because of its (i) hazardous characteristics including, but not limited to, ignitability, toxicity, corrosivity, and/or reactivity or (ii) potentially significant negative impact on public health and safety and/or the environment.
2.3. Amendments of §345-11 of the Existing Zoning Law

§345-11 of the Existing Zoning Law is hereby amended so as to delete present Clauses A. and B. thereof in their entirety, and to replace the same with the following text:

“A. Any Use Not Specifically Permitted is Prohibited. It is the purpose of this Chapter to allow flexibility of land use, subject always to the restrictions, prohibitions, and design and performance requirements contained herein. Any use not specifically set forth as a permitted use in any district shall be expressly prohibited in that district. A use specifically set forth as a permitted use in one district shall not be permitted in another district unless it is specifically set forth as a permitted use in said other district. Except as otherwise provided herein: (a) no land shall be cleared, excavated, or graded in connection with a commercial use, no building or land shall hereafter be used or occupied, and no building or part thereof shall be erected, moved or altered, unless in conformity with the regulations herein specified for the district in which it is located; and (b) no building shall hereafter be erected or altered to exceed the height, to accommodate or house a greater number of families, to occupy a greater percentage of lot area or to have narrower or smaller rear yards, front yards, or side yards, than is specified herein for the district in which such building is located. “

B. If a there is a question as to whether a proposed use is one of the defined uses set forth in this Chapter, or if a proposed use may be reasonably described by more than one of the defined uses set forth in this Chapter, the Planning Board, upon written application, shall render a formal determination as to the proper definition of the proposed use in question. Once the Planning Board has determined the proper definition of the proposed use, the requirements of this Chapter will determine if the proposed use is a permitted use, a permitted accessory use, a special permit use, or a prohibited use. The authority granted to the Planning Board under this subsection 345-11.B shall not permit the Planning Board to allow, by special permit or otherwise, any use prohibited by subsection 345-11.C or by §345-38.

Present Clause C. of §345-11 of the Existing Zoning Law is hereby amended to read in its entirety as follows:

C. General Use Restriction. Any use not designated as a principal permitted use, a permitted accessory use or a special permit use is specifically prohibited within the Town of Bethel.

2.4. Amendment of §345-21 of the Existing Zoning Law
§345-21 of the Existing Zoning Law is hereby further amended so as to add a new Clause L, as follows:

L. Whenever a new Manufacturing Use or Light Industrial Use is proposed, or such use is proposed as an expansion of an existing non-conforming use, the following additional performance standards shall apply:

(1) All Manufacturing Use or Light Industrial Use processes shall be performed within an Enclosed Structure.

(2) All storage of raw materials used in any Manufacturing Use or Light Industrial Use process and any waste generated from any Manufacturing Use or Light Industrial Use process shall be stored in an Enclosed Structure or a container made from impervious materials which prevents exposure of its contents to the ambient elements.

a. Upon application, the Planning Board may waive the requirement that raw materials be stored in an Enclosed Structure or impervious container if the applicant is able to show to the satisfaction of the Planning Board that (i) the storage of the raw materials will not cause Contamination and (ii) the storage of such raw materials in an Enclosed Structure or impervious container is not practicable.

2.5. Amendment of §345-38 of the Existing Zoning Law

§345-38 of the Existing Zoning Law is hereby amended so as to delete the parenthetical “(Reserved)” therefrom, and to replace the same with the following text:

§345-38. Explicitly Prohibited Uses; Prohibition Against Hazardous or Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes; Prohibition Against Certain Waste Storage Facilities, Landfills and Dumps.

A. Explicitly Prohibited Uses. The following uses and activities (being respectively defined in Subsection C. below of this § 345-38) are hereby expressly and explicitly prohibited in each and every zoning district within the Town, and no building or structure shall be created, altered or erected, and no body of water, land or building thereon shall be used, for any of such uses or activities:

1. Injection Well;
2. Land Application Facility;
3. Natural Gas And/Or Petroleum Exploration Activities;
4. Natural Gas And/Or Petroleum Extraction Activities;
5. Natural Gas And/Or Petroleum Extraction, Exploration Or Production Waste Disposal/Storage Facility;
6. Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes Dump
7. Natural Gas Compression Facility;
8. Natural Gas Processing Facility;
9. Non-regulated Pipelines;
10. Underground Injection;
11. Underground Natural Gas Storage;
12. High-Impact Uses;
13. Hazardous Waste Landfill (subject to the requirements of NY ECL § 27-1107); and

Any condition caused or permitted to exist in violation of this Clause A. is a threat to public health, safety and welfare, and is hereby declared and deemed to be a nuisance. Collectively the above expressly prohibited uses may be referred to in this Chapter as “Explicitly Prohibited Uses,” any one of the above expressly prohibited uses may be referred to in this Chapter as an “Explicitly Prohibited Use,” and any combination of more than one such use may also be referred to as “Explicitly Prohibited Uses.”

B. Prohibition against Hazardous Waste Landfills, Dumps, Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes Dumps and Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes Disposal/Storage Facilities. The Town of Bethel hereby exercises its authority and right under NY ECL §27-0711 to adopt a local law that is consistent with the Environmental Conservation Law Article 27, such consistency demonstrated by the fact that this Local Law complies “with at least the minimum applicable requirements” set forth in such statute, and the rules and regulations promulgated pursuant to said Article 27.

It shall be unlawful for any person to operate a Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes Disposal/Storage Facility, Hazardous Waste Landfill, or Dump. The foregoing prohibition regarding the operation of a Hazardous Waste Landfill shall be subject to the requirements of NY ECL §27-1107. It shall be unlawful for any person to produce, store, inject, discard, discharge, dispose release, or maintain, or to suffer, cause or permit to be produced, stored, injected, discarded, discharged, disposed, released, or maintained, anywhere within the Town, any or Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes.

C. Defined terms applicable to this §345-38. For purposes of this §345-38, the following terms shall have the meanings respectively set forth below:

AGRICULTURE USE--- Land used for the production of crops and/or livestock and livestock products (as those terms are defined at Section §301 of the New York State Agriculture and Markets Law).
DUMP --- The use of real property operated without a permit or other governmental authorization for the disposal of any type of waste, including solid waste, garbage, or trash in which such unwanted materials are deposited, disposed, discharged, injected, placed, buried or discarded without intention of further use.

GAMBLING – A use devoted to the wagering of money or something of material value on a contest of chance or a future contingent event not under the control or influence of those making wagers, upon an agreement or understanding that those making wagers will receive something of value in the event of a certain outcome. Notwithstanding the foregoing definition, gambling shall not include (i) any lottery operated by the State of New York and the sale of lottery tickets in connection therewith as may be authorized and prescribed by the Legislature or (ii) any use as may be authorized in accordance with Chapter 97 of the Code entitled “Bingo” or Chapter 186 of the Code entitled “Games of Chance”.

GATHERING LINE, or PRODUCTION LINE --- Any system of pipelines (and other equipment such as drip stations, vent stations, pigging facilities, valve box, transfer pump station, measuring and regulating equipment, yard and station piping, and cathodic protection equipment), used to move oil, gas, or liquids from a point of production, treatment facility or storage area to a transmission line, which is exempt from the Federal Energy Regulatory Commission’s jurisdiction under section 1(b) of the Natural Gas Act, and which does not meet the definition of a “Major utility transmission facility” under the Public Service Law of New York, Article 7, §120(2)(b).

HAZARDOUS WASTE LANDFILL --- The use of real property pursuant to a permit issued by the governmental authority with jurisdiction over its operation as a site for the disposal of Hazardous Waste through burial or where such wastes are applied to the soil surface or injected into the upper layer of the soil.

HAZARDOUS WASTE --- Shall have the meaning set forth at NY ECL §27-0901(3).

HIGH-IMPACT USES --- 1. The following uses and activities are specifically declared and defined to be “High-Impact Uses”:

(a) Waste-to-Energy Facilities;

(b) Dumps;
(c) Industrial or manufacturing processes engaged in the production of any products classified under the following North American Industry Classification (NAIC) 2007 system code numbers: Veneer, Plywood & Engineered Wood Product Manufacturing (3212), except for Truss Manufacturing (321214), which shall not be included as a High Impact Use; Pulp, Paper and Paperboard Manufacturing (3221); Petroleum & Coal Manufacturing (3241); Basic Chemical Manufacturing (3251); Pesticide, Fertilizer & Other Agricultural Chemical Manufacturing (3253); Other Chemical Products & Preparation Manufacturing (3259); Clay Product & Refractory Manufacturing (3271); Glass & Glass Product Manufacturing (3272); Cement & Concrete Manufacturing (3273); Lime & Gypsum Manufacturing (3274); Other Nonmetallic Mineral Product Manufacturing (3279); Iron Steel Mills & Ferroalloy Manufacturing (3311); Steel Product Manufacturing from Purchased Steel (3312); Alumina & Aluminum Production & Processing (3313); Nonferrous Metal (Not Alum) Production & Processing (3314); Foundries (3315); Resin, Synthetic Rubber, and Artificial Synthetic Fibers and Filaments Manufacturing (3252); Rubber Products Manufacturing (3262); and Leather and Allied Product Manufacturing (3161); provided, however, that notwithstanding the foregoing, manufacturing or industrial processes classified under NAIC system code numbers Pottery, Ceramics, and Plumbing Fixture Manufacturing (32711); Vitreous China, Fine Earthenware, and Other Pottery Product Manufacturing (327112); Other Pressed and Blown Glass and Glassware Manufacturing (327212); Glass Product Manufacturing Made of Purchase Glass (327215); and Leather and Hide Tanning and Finishing (316110) shall not be considered a High-Impact Use if (i) the total number of full and/or part time employees does not exceed five persons engaged in the manufacturing or industrial process in question and (ii) the use is not otherwise a High-Impact Use as defined in subparagraph (d) below; and

(d) Any other use likely to have a significant negative impact upon the environment; or cause or significantly contribute to an increase in mortality; or an increase in serious irreversible, or incapacitating reversible illness; or pose a substantial present or potential hazard to human health due to the nature of its operation, materials used and/or wastes generated. Any use requiring a permit from a state or federal governmental agency, which permit would allow for the discharge, storage, transport, disposal, or release of Contamination, shall be evidence of a High-Impact Use, as determined by the type and volume of Contamination. High-Impact Uses include those uses which have associated therewith any detrimental or obnoxious noise, vibration, smoke, odors, dust, heavy truck traffic, toxic or hazardous raw materials or Hazardous Wastes, and/or Contamination.
2. For purposes of this Chapter, any use, other than a Manufacturing Use, that is defined as a “High-Impact Use” by operation of subsection (1)(d), above, shall not be deemed a High-Impact Use if it is any of the following: (i) Agriculture Use, (ii) any use that is specifically articulated in this Chapter as allowed by right (within an appropriate zoning district) as a principal permitted or accessory use, (iii) any use that is specifically articulated in this Chapter as allowed (within an appropriate district) as a principal permitted or accessory use by special use permit or (iv) any use that is specifically articulated in the Town Code as a permissible use pursuant to a permit issued by the Town and that said use is conducted within an appropriate zoning district.

INJECTION WELL --- A bored, drilled or driven shaft whose depth is greater than the largest surface dimension, or a dug hole whose depth is greater than the largest surface dimension, through which fluids (which may or may not include semi-solids) are injected into the Subsurface and ninety (90) percent or more of such fluids do not return to the surface within a period of ninety (90) days. The definition of Injection Wells does not include: (a) any On-site Wastewater Treatment System, as that term is defined at §257-46 of the Town Code, (b) drainage wells, swales, or ditches used to drain surface fluids, primarily storm runoff, into the ground, (c) geothermal wells associated with the recovery of geothermal energy for heating or production of electric power, (d) any Agriculture Use, or (e) bore holes drilled to produce potable water to be used as such.

LAND APPLICATION FACILITY --- A site where any Hazardous Wastes or Natural Gas and/or Petroleum Extraction, Exploration or Production Wastes are applied to the soil surface or injected into the Subsurface

NATURAL GAS - Methane and any gaseous substance, either combustible or non-combustible, which is produced in a natural state from the earth and which maintains a gaseous or rarefied state at standard temperature and pressure conditions, and/or gaseous components or vapors occurring in or derived from petroleum or other hydrocarbons.

NATURAL GAS AND/OR PETROLEUM EXPLORATION ACTIVITIES - Geologic or geophysical activities related to the search for natural gas, petroleum or other subsurface hydrocarbons including prospecting, geophysical and geologic seismic surveying and sampling techniques, but only to the extent that such activities involve or employ core, rotary, or any other type of drilling or otherwise making any penetration or excavation of any land or water surface in the search for and evaluation of natural gas, petroleum, or other subsurface hydrocarbon deposits.

NATURAL GAS AND/OR PETROLEUM EXTRACTION ACTIVITIES - The digging or drilling of a well for the purposes of exploring for, developing or producing natural gas, petroleum or other subsurface hydrocarbons,
including without limitation any and all forms of shale fracturing.

**NATURAL GAS AND/OR PETROLEUM EXTRACTION, EXPLORATION OR PRODUCTION WASTES ---** Any of the following in any form, and *whether or not* such items have been excepted or exempted from the coverage of any federal or state environmental protection laws, or have been excepted from statutory or regulatory definitions of “industrial waste,” “hazardous,” or “toxic,” and whether or not such substances are generally characterized as waste: (a) Radioactive Material Spoils (b) crude oil or natural gas drilling fluids, (c) crude oil or natural gas exploration, drilling, production or processing wastes, (d) crude oil or natural gas drilling treatment wastes (such as oils, frac fluids, produced water, brine, flowback, sediment and/or any other liquid or semi-liquid material), (e) any chemical, waste oil, waste emulsified oil, mud, or sediment that was used or produced in the drilling, development, transportation, processing or refining of crude oil or natural gas, (f) soil contaminated in the drilling, transportation, processing or refining of crude oil or natural gas, (g) drill cuttings from crude oil or natural gas wells, or (h) any other wastes associated with the exploration, drilling, production or treatment of crude oil or natural gas. This definition specifically intends to include some wastes that may otherwise be classified as “solid wastes which are not hazardous wastes” under 40 C.F.R. §261.4(b). The definition of Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes does *not* include (i) animal manure and/or recognizable and non-recognizable food wastes, (ii) waste generated by Agriculture Use, or (iii) waste generated by a Public Utility Facility.

**NATURAL GAS AND/OR PETROLEUM EXTRACTION, EXPLORATION OR PRODUCTION WASTES DISPOSAL/STORAGE FACILITY ---** Any of the following: (a) tanks of any construction (metal, fiberglass, concrete, etc.), (b) impoundments, (c) pits, (d) evaporation ponds, or (e) other facilities, in any case used for the storage or treatment of Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes that: (i) are being held for initial use, (ii) have been used and are being held for subsequent reuse or recycling, (iii) are being held for treatment, or (iv) are being held for storage.

**NATURAL GAS AND/OR PETROLEUM EXTRACTION, EXPLORATION OR PRODUCTION WASTES DUMP ---** Land upon which Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes, or their residue or constituents before or after treatment, are deposited, disposed, discharged, injected, placed, buried or discarded, without any intention of further use.

**NATURAL GAS COMPRESSION FACILITY ---** Those facilities or combination of facilities that move natural gas or oil from production
fields or natural gas processing facilities in pipelines or into storage; the term shall include equipment for liquids separation, natural gas dehydration, and tanks for the storage of waste liquids and hydrocarbon liquids.

NATURAL GAS PROCESSING FACILITY --- Those facilities that separate and recover natural gas liquids (NGLs) and/or other non-methane gases and liquids from a stream of produced natural gas, using equipment for any of the following: cleaning or stripping gas, cooking and dehydration, residual refinement, treating or removing oil or condensate, removing water, separating NGLs, removing sulfur or carbon dioxide, fractionation of NGLs, or the capture of CO₂ separated from natural gas streams.

NON-REGULATED PIPELINES --- Those pipelines that are exempt or otherwise excluded from regulation under federal and state laws regarding pipeline construction standards or reporting requirements. Specifically includes production lines and gathering lines. Notwithstanding the foregoing, Non-Regulated Pipelines are not intended, and shall not be construed, to: (i) prevent or prohibit the transmission of natural gas through utility pipes, lines, or similar appurtenances for the limited purpose of supplying natural gas to residents of or buildings located in the Town; or (ii) prevent or prohibit the incidental or normal sale, storage, or use of lubricating oil, heating oil, gasoline, diesel fuel, kerosene, or propane in connection with any legal residential, business, commercial, or other uses within the Town, including any Agriculture Use, so long as such uses do not involve any Natural Gas And/Or Petroleum Exploration Activities, or Natural Gas And/Or Petroleum Extraction Activities.

PIPELINE --- All parts of those physical facilities through which petroleum, natural gas, other gaseous substances, hazardous liquids, or chemicals move in transportation (including pipes, valves and other equipment and appurtenances attached to pipes and other equipment such as drip stations, vent stations, pigging facilities, valve boxes, transfer pump stations, measuring and regulating equipment, yard and station piping, and cathodic protection equipment) whether or not laid in public or private easement or private right of way within the Town. This term includes, without limitation, gathering lines, production lines, and transmission lines.

PUBLIC UTILITY --- An enterprise that provides electric, gas, steam, telephone service, water or sewerage directly to the general public. For purposes hereof, a public utility is an entity which operates as a monopoly, and whose rates charged to customers are established by a utility commission.
PUBLIC UTILITY FACILITY — Buildings, structures, and facilities, including generating and switching stations, poles, lines, pipes, regulated pipelines, pumping stations, repeaters, antennas, transmitters and receivers, valves, owned and operated by a Public Utility and relating to the furnishing of utility services to the public by that Public Utility.

RADIOACTIVE MATERIAL — Material in any form that emits radiation, but only if such material has been moved from its naturally occurring location through an industrial process.

RADIOACTIVE MATERIAL SPOILS — Radioactive material consisting of drill spoils or soil produced through the excavation or drilling of land and related to, arising in connection with, or produced by or incidental to the exploration for, the extraction or production of, or the processing, treatment, or transportation of, natural gas, petroleum, or any related hydrocarbons.

RADIATION — The spontaneous emission of particles (alpha, beta, neutrons) or photons (gamma) from the nucleus of unstable atoms as a result of radioactive decay.

SUBSURFACE — Below the surface of the earth, or of a body of water, as the context may require.

TRANSMISSION LINE — A pipeline that transports oil, gas, or water to end users as a public utility and which is subject to regulation either by: (a) the Federal Energy Regulatory Commission's jurisdiction under section 1(b) of the Natural Gas Act, or (b) as a “Major utility transmission facility” under the Public Service Law of New York, Article 7, §120(2)(b).

UNDERGROUND INJECTION — Subsurface emplacement of Hazardous Wastes or Natural Gas and/or Petroleum Extraction, Exploration or Production Wastes by or into an Injection Well.

UNDERGROUND NATURAL GAS STORAGE — Subsurface storage, including in depleted gas or oil reservoirs and salt caverns, of natural gas that has been transferred from its original location for the primary purpose of load balancing the production of natural gas. Includes compression and dehydration facilities, and pipelines.

WASTE-TO-ENERGY FACILITY — A plant or facility that creates energy in the form of electricity or heat from the incineration of solid waste or recycled material.

WATER; WATER RESOURCES — All streams, ditches, lakes, ponds, reservoirs, marshes, vernal pools, watercourses, waterways, wells,
springs, drainage systems, and all other bodies or accumulations of water, surface or underground, intermittent or perennial, which are contained in, flow through or border upon the Town or any portion thereof.

2.6. Amendments of Clause E. of §345-50 of the Existing Zoning Law

Clause E. of §345-50 of the Existing Zoning Law is hereby amended so as to delete the text of clause (1) thereof in its entirety, and to replace the same with the following text:

“The Zoning Board of Appeals shall have the power, upon an appeal from a decision or determination of the Codes Enforcement Officer or other administrative official or body charged with the enforcement of this Zoning Law, including the Planning Board, after public notice and hearing and in accordance with the requirements of law and this Chapter, to grant area variances and use variances as those terms are defined herein. For the purposes of this §345-50, any person taking an appeal or making application for review by the Zoning Board of Appeals shall be referred to as the “applicant”.”

Clause E. of §345-50 of the Existing Zoning Law is hereby further amended so as to delete the text of clause (2) thereof in its entirety, and to replace the same with the following text:

“(2) Use Variances.

(A) The Zoning Board of Appeals shall have the power, upon an appeal from a decision or determination of the Codes Enforcement Officer or other administrative official or body charged with the enforcement of this Zoning Law, including the Planning Board, after public notice and hearing and in accordance with the requirements of law and this Chapter, to grant use variances as defined herein.

(B) If a use variance is granted, the applicant must obtain site plan review approval from the Planning Board prior to commencing the use and prior to obtaining a Building Permit.

(C) No such use variance shall be granted by the Zoning Board of Appeals without a showing by the applicant that otherwise applicable zoning regulations and restrictions have caused unnecessary hardship.

1. Unnecessary Hardship. In order to prove such unnecessary hardship
the applicant is required to demonstrate to the Zoning Board of Appeals that, with respect to every permitted use under the zoning regulations for the particular district where the property is located, each of the following four criteria is satisfied:

a. the applicant cannot realize a reasonable return on the entire parcel of property, and such lack of return is substantial as demonstrated by competent financial evidence;

b. that the alleged hardship relating to the property in question is unique, and does not apply to a substantial portion of the district or neighborhood involved;

c. that the requested use variance, if granted, will not alter the essential character of the neighborhood; and

d. that the alleged hardship has not been self-created.

2. Reasonable Rate of Return. In evaluating whether the applicant can realize a reasonable rate of return, the Zoning Board of Appeals shall examine whether the entire original or expanded real property holdings of the applicant are incapable of producing a reasonable rate of return (and not just the site of the proposed development project). No use variance shall be granted unless, in addition to satisfying all other applicable provisions of law and this Chapter, the Zoning Board of Appeals finds that the applicant has clearly demonstrated, by detailed “dollar and cents” proof, the inability to obtain a reasonable return for the entire parcel (and not just the site of the proposed development project) and for each and every permitted use in the district (including those uses permitted by Special Use Permit).

3. Unique Hardship. No use variance shall be granted unless, in addition to satisfying all other applicable provisions of law and this Chapter, the Zoning Board of Appeals finds that the entire parcel of which the development project is a part possesses unique characteristics that distinguish it from other properties in the area.

4. Essential Character of the Neighborhood. In making its determination of whether the proposed development project will alter the essential character of the neighborhood, the Zoning Board of Appeals shall take into account factors that are of vital importance to the citizens of the Town including without limitation: (i) the rural residential, agricultural and historic character of the Town, (ii) its irreplaceable recreation and tourism sites, (iii) the extent of hazard to life, limb or property that may result from the proposed development project, (iv) health impacts, (v) the social and economic impacts of traffic congestion, noise, dust, odors, emissions, solid waste generation and other nuisances, (vi) the impact on property values, and (viii) whether the applicant will use a style of
development that will result in degradation to the air quality, water quality or scenic and natural resources of the Town. In order to find that the proposed development project does not alter the essential character of the neighborhood, the Zoning Board of Appeals shall interpret the public interest in said essential character of the neighborhood to require, at a minimum, that the development project will not do any of the following: (x) pose a threat to the public safety, including public health, water quality or air quality, (y) cause an extraordinary public expense, or (z) create a nuisance.

5. Self-Created Hardship. The Zoning Board of Appeals may find that the applicant suffers from a self-created hardship in the event that the Board finds that (i) the applicant’s inability to obtain a reasonable return on the real property as a whole results from having paid too much for it or from a poor investment decision; (ii) the applicant previously subdivided the real property and is left with only a portion which suffers from some unique condition which did not apply to the parcel prior to its subdivision, and from which relief is sought; or (iii) when the applicant purchased the property, he or she knew or should have known the property was subject to the zoning restrictions from which relief is sought.

(D) In addition to the application and procedural requirements from time to time established pursuant to §345-49, an application for any use variance shall contain a written narrative explaining what the application is for, and how the development project meets or exceeds all of the criteria for a use variance, including:

1. Competent Financial Evidence. Competent financial evidence containing reasonable specification of the nature and factual particulars of such claim, and articulating the basis for the applicant’s claim, and including, at a minimum (as to the entire parcel of which the proposed development project is a part): (a) date of acquisition; (b) the purchase price; (c) present value of the property; (d) the amount of real estate taxes; (e) the amount of mortgages or liens and other expenses; (f) the asking price for the property when it had been offered for sale; (g) the costs of demolishing any existing structures on the property; (h) cost of erecting a new building(s) for each and every permitted use in the zoning district (including uses allowed by Special Use Permit); (i) efforts to market the property; and (j) a schedule of all other property in common ownership at either the date of the enactment of this Chapter or thereafter.

2. Competent financial evidence must include “dollars and cents proof” such as appraisals, economic studies, and any other evidence supporting the applicant’s contention that the desired relief is
appropriate, including appraisals relating to any alleged diminution of all or substantially all of the fair market value of the real property. For the purposes of §345-50.E(2)(D)(1)(j), the term “common ownership” means all other interests in real property either located within the Town or contiguous to the Town held by the applicant or any of the applicants (if more than one), whether such ownership is of a legal or equitable interest, in whole or in part, contiguous or not, and whether such property interest is held by any of the applicants through a legal or equitable interest in a(neighbor) corporation, partnership, trust, business, entity, association, fund, joint venture, or individually.

3. Unique Nature of the Property. The applicant must provide evidence demonstrating the unique nature of the parcel as a whole. The fact that improvements already existing at the time of the application are old, obsolete, outmoded or in disrepair or the fact that the property is then unimproved shall not be deemed to make the plight of the property unique or to contribute thereto. Exceptional topographic conditions are an example of a factor demonstrating the unique nature of the property.

4. Alteration of the Essential Character of the Neighborhood. The applicant must demonstrate that the proposed development project will not change the essential character of the neighborhood with regard to physical, economic, social or environmental elements. Adverse impacts to the essential character of the neighborhood, where such impacts are deemed significant by the Zoning Board of Appeals, include, but are not limited to, decreased quality or increased quantity of stormwater runoff, increased soil erosion, increased traffic congestion, decreased road quality, increased noise, dust, and/or odor, reduced wildlife habitat, decreased air quality, decreased water quality, impairment of the viewscape, creation of solid wastes, negative impacts on sustainability efforts, increased social costs, increased emergency response times, negative impacts to public infrastructure, decreased property values, and negative impacts on the health of area residents.

5. Hardship Not Self-Created. In order to show that the hardship is not self-created, the applicant must demonstrate that either (a) when the property was purchased the zoning restrictions from which a use variance is now sought were not in existence or did not otherwise apply, or (b) some other change has occurred since the applicant’s purchase which makes the use non-conforming, as long as the change was not caused by the applicant.

(E) The Zoning Board of Appeals, in the granting of use variances, shall grant
only the minimum variance that it shall deem necessary and adequate to allow an economically beneficial use of the property, and at the same time preserve and protect the essential character of the neighborhood and the health, safety and welfare of the community.

(F) The Zoning Board of Appeals shall, in the granting of use variances, shall have the authority to impose such reasonable conditions and restrictions as are directly related to and incidental to the proposed development project. Such conditions shall be consistent with the spirit and intent of this Chapter, and shall be imposed for the purpose of minimizing any adverse impact such use variance may have on the neighborhood or community. Such conditions may include, but are not limited to, landscaping, lighting, access and egress, signs, screening, architectural features, location and layout of buildings, limitations upon the use or characteristics of the use which are reasonably related to the public health, safety and general welfare and as may be necessary to carry out the intent of this Chapter. If the applicant refuses to accept such conditions and restrictions, the use variance shall be denied. The Planning Board shall incorporate into the approved site plan any such conditions and restrictions established by the Zoning Board of Appeals under this subsection F when it conducts site plan review as required by §345-50.E(2)(B).

(G) In addition to the application requirements from time to time established pursuant to §345-49 and those requirements set forth above at §345-50.E(2)(D), the following written reports and documents shall be required to be submitted in connection with any appeal or application for a use variance concerning what is otherwise an Explicitly Prohibited Use (as defined in §345-38). The purpose of these reports in the context of otherwise Explicitly Prohibited Uses is to assist the Zoning Board of Appeals in its determination as to the impact of a proposed development project on the Town and/or the “essential character of the neighborhood” and/or to determine whether the proposed development project complies with the requirements of this Chapter:

1. Environmental Assessment Form. A completed draft of an Environmental Assessment Form, Part I.

2. Description of Surrounding Uses. The approximate location of all neighboring residential, hamlet, park/recreational, cultural/tourism, and/or agricultural areas, as well as any appropriately designated Unique Areas, environmentally sensitive lands (as designated in accordance with 6 NYCRR Part 190), and Critical Environmental Areas (as designated in accordance with 6 NYCRR 617.14[g]) within a two (2) mile radius of the perimeter of the site of the proposed use. For the purposes of this §345-50.E(2)(G), the site of the proposed use shall be referred to as the “project site".
3. Traffic Impact Report. A traffic impact report containing:
   i. the proposed traffic circulation plan, the projected number of
      motor vehicle trips to enter or leave the project site, estimated for daily
      and peak hour traffic levels;
   ii. existing and proposed daily and peak traffic hour levels as road
      capacity levels on all roads serving the project site;
   iii. a determination of the area of impact of traffic to and from the
      project site;
   iv. the proposed traffic routes to the nearest intersection of the
      project site with an arterial highway, including gross weights and
      heights of vehicles;
   v. the projected traffic flow pattern including vehicular movements
      at all major intersections likely to be affected by the proposed
      development of the project site;
   vi. the impact of project site traffic upon existing abutting public and
      private ways in relation to existing road capacities;
   vii. a traffic impact analysis of the effects of the proposed
      development of the project site on the transportation network in the
      Town using passenger car equivalents;
   viii. articulation of the effects and impacts of the proposed
      development of the project site on traffic based on existing conditions
      and projected future background traffic on the state, county, and Town
      road system;
   ix. evaluation of whether the traffic conditions resulting from the
      proposed development of the project site are likely to hinder the
      passage of police, fire and emergency response vehicles, or degrade the
      quality of life, and/or otherwise contribute to hazardous traffic
      conditions; and
   x. determination of whether there is sufficient road frontage so that
      any vehicle leaving the project site may turn into the lane of traffic
      moving in the desired direction and be channeled within such lane
      before crossing the nearest intersection or proceeding along the road
      and any vehicle entering the property may turn out of the nearest lane
      of traffic without interfering with other traffic.

4. Road Impact Report. An evaluation of (i) appropriate roadway
   geometry including required road widths, bridge widths, starting and
   stopping sight distances, intersection sight distances, horizontal and
   vertical curves along the proposed traffic routes in the vicinity of the
   project site; (ii) the adequacy of existing pavement structures along the
   proposed traffic routes in the vicinity of the project site to accommodate
   the full weight load of any trucks likely to be used in connection with the
   proposed development project; and (iii) impacts to the rural or scenic
   character of any roads along the proposed traffic route in the vicinity of the
   project site.
5. Transportation Plan. A description of ingress and egress through the proposed project site through which equipment and supplies will be delivered and which will provide access during and after construction, and identification of any roads, streets, intersections, bridges, and other facilities along the proposed traffic route leading to the project site that do not meet New York State Department of Transportation standards. Such plan shall describe any anticipated improvements to existing roads, bridges, or other infrastructure, any new road or access construction, measures which will be taken to avoid damaging access/traffic routes and measures that will be taken to restore damaged routes following construction, and measures to maintain the scenic and/or rural characteristics of such roads.

6. Noise Impact Report. A report on the following topics:
   i. the existing audible conditions at the project site to identify a baseline sound presence and preexisting ambient noise, including seasonal variation;
   ii. a description and map of sound producing features of the proposed project from any noise generating equipment and noise generating operations that will be conducted in connection with the project site, including noise impacts from truck traffic travelling within the Town to and from the project site;
   iii. for the noise generated by construction and use of the project site, the range of noise levels and the tonal and frequency characteristics expected, and the basis for the expectation;
   iv. a description and map of the existing land uses and structures including any sound receptors (e.g., residences, hospitals, libraries, schools and places of worship, parks, cultural/tourism venues, areas with outdoor workers) within one (1) mile of the project site boundaries. Said description shall include the location of the structure/land use, distances from the project site and expected decibel readings for each receptor;
   v. the report shall cover low frequency, A-weighted, infrasound, pure tone, and repetitive/impulse noise; and
   vi. the report shall describe the project site’s proposed noise-control features, including specific measures proposed to protect workers and mitigate noise impacts for sensitive receptors.

7. Visual Assessment. A visual presentation of how the project site will relate to and be compatible with the adjacent and neighboring areas, within a two (2) mile radius of the perimeter of the project site. This presentation shall include computerized photographic simulation showing the project site during construction and fully developed and demonstrating any visual impacts from strategic vantage points. Color photographs of the project site from at least two locations accurately depicting the existing
conditions shall be included. The study shall also indicate the color treatment of any of the improvements that will be constructed at the project site and any visual screening incorporated into the project site that is intended to lessen visual impacts. Lighting impacts shall also be assessed.

8. Report of Hazardous Wastes, Natural Gas and/or Petroleum Extraction, Exploration or Production Wastes and Other Solid Wastes. A report of (i) a description of Hazardous Wastes, Natural Gas and/or Petroleum Extraction, Exploration or Production Wastes and other solid wastes, industrial wastes, and potential for Contamination expected to be produced, stored, injected, discarded, discharged, disposed, released, or maintained on the project site; (ii) a description of controls and practices to eliminate or minimize release of all such wastes into the environment; and (iii) a plan for ultimate disposal of such wastes whether on or off-site.

9. Energy Use Analysis. A written (i) description of the type(s) of energy to be used at the project site upon completion of the project improvements; (ii) projection of the quantity of energy use over the projected life of the improvement and the source of that energy; (iii) description of the impact of that energy use on current energy users in the Town; and (iv) description of energy savings steps to be taken in the construction and use of the project site improvements.

10. Compatible Uses Report. A written presentation of the characteristics of the proposed development project that may decrease the Town’s and/or the neighborhood’s suitability for other uses such as residential, commercial, historical, cultural, tourism, recreational, environmental or scenic uses.

11. Fiscal Impact Assessment. A written assessment describing the adverse effects and impacts on Town revenue and costs necessitated by additional public facility and service costs likely to be generated by the proposed development project.

i. Description of the potential fire, equipment failures and emergency scenarios associated the proposed development project that may require a response from fire, emergency medical services, police or other emergency responders;

ii. An analysis of the worst case disaster associated with the proposed development project and the impact of such a disaster upon the health, safety and welfare of the inhabitants of the Town and their property.
iii. Designation of the specific agencies that would respond to potential fires, equipment failures, accidents or other emergencies;

iv. Description of all emergency response training and equipment needed to response to a fire, accident, equipment failure or other emergency, including an assessment of the training and equipment available to local agencies; and

v. the approximate or exact location of all fire, police, and emergency response service facilities within a five (5) mile radius of the perimeter of the project site; and a detailed fire control and pollution prevention and emergency response plan.

13. Public Facilities and Services Assessment. A written assessment describing:

(i) whether current Town public facilities and services, including water supply, fire protection, school services, recreation facilities, police protection, roads and storm-water facilities, are adequate for the proposed development project (taking into account all other uses that have been permitted or are currently operating in the Town);

(ii) a comparison of the capacity of the public services and facilities to the maximum projected demand that may result from the proposed development project (in determining the effect and impact of the proposed development project on fire, police, and emergency services, the review shall take into consideration response times, and the number and location of available apparatus and fire, police and emergency service stations that are manned by full time professional service personnel; and where applicable, calculation of response time shall also include the time it takes volunteer emergency personnel to get to their stations); and

(iii) a review of the impact of the proposed development project on the safety of all children going to and from school by car, bus, bicycle, and walking during and outside of school zone hours and whether safety measures such as signaled cross walks, elevated sidewalks, green space buffers for pedestrians/bikes where established walking/biking route overlap/run along intended truck routes so as to prevent accidents.

14. Property Value Assessment. A written property value analysis, prepared by a licensed appraiser in accordance with industry standards, regarding the potential impact of the development project on the value of properties adjoining the project site.

15. Health Impact Assessment. A written human health impact assessment that identifies ways in which the proposed development project could adversely affect the health of Town residents and a priority list of recommendations to minimize the potential health impacts of the
proposed development project. The health impact assessment shall include (i) a risk assessment of possible impact of chemical exposure on the health of residents, including the Chemical Abstract Service number of all chemicals proposed to be used or generated at the development project site; (ii) an assessment of possible health effects due to industrial operations in non-heavy industrial zoned areas; (iii) an assessment of possible health effects due to community changes including the presence of an industrial activity in a previously non-heavy industrial area, a perceived loss of shared community ideals and cohesion, declining property values, impacts to the education system and sudden changes in population numbers, demographics and customs, and (iv) proposed remedies to address principal findings.

Clause E. of §345-50 of the Existing Zoning Law is hereby further amended so as to delete the text of clause (3) thereof in its entirety, and to replace the same with the following text:

“(3) Area Variances.

(a) The Zoning Board of Appeals shall have the power, upon an appeal from a decision or determination of the Codes Enforcement Officer or other administrative official or body charged with the enforcement of this Zoning Law, including the Planning Board, after public notice and hearing and in accordance with the requirements of law and this Chapter, to grant area variances as defined herein.

(b) In making a determination whether to grant, grant conditionally, or deny an application for an area variance, the Zoning Board of Appeals shall take into consideration the benefit to the applicant if the area variance is granted, and balance this benefit against the detriment to the health, safety and welfare of the neighborhood or community by making such grant. In making such determination the board shall consider each of the following factors:

i. whether an undesirable change will be produced in the character of the neighborhood or a detriment to nearby properties will be created by the granting of the area variance;
ii. whether the benefit sought by the applicant can be achieved by some method, feasible for the applicant to pursue, other than an area variance;
iii. whether the requested area variance is substantial;
iv. whether the proposed area variance will have an adverse effect or impact on the physical or environmental conditions in the
neighborhood or district; and
v. whether the alleged difficulty was self-created; which consideration shall be relevant to the decision of the Board of Zoning Appeals, but which consideration shall not necessarily preclude the granting of the area variance.

(c) The Zoning Board of Appeals, in the granting of area variances, shall grant the minimum area variance that it shall deem necessary and adequate and at the same time preserve and protect the character of the neighborhood and the health, safety and welfare of the community.

(d) In addition to the application requirements from time to time established pursuant to §345-49, applications for an area variance shall contain a written narrative explaining what the application is for, and how the development project meets or exceeds all of the criteria for an area variance.

(e) The Zoning Board of Appeals shall, in the granting of area variances, have the authority to impose such reasonable conditions and restrictions as are directly related to and incidental to the proposed use of the property. Such conditions shall be consistent with the spirit and intent of this Chapter, and shall be imposed for the purpose of minimizing any adverse impact such area variance may have on the neighborhood or community. If the applicant refuses to accept such conditions and restrictions, the area variance shall be denied. If the Zoning Board of Appeals imposes any such conditions and restrictions as provided herein, the applicant must apply to the Planning Board for site plan review and the approved site plan will incorporate any such conditions and restrictions.

(f) If an area variance is granted, the applicant is not relieved of any obligations to obtain site plan review approval from the Planning Board prior to commencing the use and prior to obtaining a Building Permit

2.7 Effective Date of this Local Law

This Local Law shall be effective upon filing with the office of the Secretary of State, and the Town Clerk is directed to immediately file a copy of this Local Law with the New York State Secretary of State as required by law.
APPENDIX A
ATTACHED TO AND FORMING A PART OF TOWN OF BETHEL (NY) LOCAL LAW NO. 1 of the YEAR 2012, being:

A local law to amend the Town of Bethel Code Chapter 345 – Zoning (as heretofore amended), by:

Establishing a Severability Clause;
Confirming and Clarifying that any Uses not Expressly Permitted are Prohibited;
Articulating Certain Explicitly Prohibited Uses;
Adding Certain New Definitions, and Changing Certain Existing Definitions;
Requiring Manufacturing and Light Industrial Uses to be Performed within Enclosed Structures; and
Modifying, Clarifying, and Adding to the Provisions Regarding Area and Use Variances Generally, and Use Variances Respecting Explicitly Prohibited Uses, Specifically.

Bethel Local Law No. 1 of 2012, the Local Law to which this Appendix A is attached, is herein sometimes referred to as “the Local Law,” “this Local Law” or “this Law.”

This Appendix A is a part of the Local Law to which it is attached for all purposes.

Section 1. Authority. This Local Law is intended to be consistent with and is adopted pursuant to the authority granted to the Town Board of the Town of Bethel under the New York State Constitution, and the Laws of the State of New York, including but not limited to the following authorities: New York State Constitution Article IX, Section 2 (c)(ii)(6), (10); Municipal Home Rule Law § 10(1)(i); Municipal Home Rule Law § 10(1)(ii)(a)(6), (11), (12), and (14); Municipal Home Rule Law § 10(1)(ii)(d)(3); Municipal Home Rule Law § 10(2); Municipal Home Rule Law § 10(3); Municipal Home Rule Law § 10(4)(a), and (b); Statute of Local Governments §10(1), (6), and (7); Town Law § 64 (17-a), (20-b), and (23); Town Law § 130(5), (6), (7), (8), (11), (14), (15), and (23); Town Law § 135; Environmental Conservation Law § 17-1101, §27-0711; and New York State Law, Public Health Law § 228 (2), and (3) and the Town Code of the Town of Bethel §345-64.

Section 2. Findings of Fact.

A. The Town of Bethel (herein, “Bethel” or the “Town”) is the centerpiece of Sullivan County. Bethel is both an agricultural area and part of the Catskills vacation and scenic Upper Delaware River regions. The Town takes great pride in and assigns great value to its natural and agricultural landscapes, rural residential character, and blend of historic, cultural, scenic, and natural resources. The world-famous Woodstock Festival of 1969 took place in Bethel, and Bethel is now proud home to the Bethel Woods Center for the Arts and The Museum at Bethel Woods, which attract a quarter of a million visitors a
year. With its beautiful forested areas, abundant water areas, and superb outdoor recreation opportunities, Bethel seeks to attract even more visitors. That strategy has the potential to be a significant economic development driver for the Town provided that Bethel protects its scenic and other natural resources and does not instead devote its open space to natural gas drilling and other high-impact uses.

B. In addition to tourism, second home ownership, together with conversion of seasonal properties to year-round homes, contributes significantly to the economic basis of the Town. This economic driver is also dependent on the Town’s protection of its air quality, water quality, scenic vistas and other natural resources.

C. The Town includes access to 27 large water bodies. Maintaining the quality of water resources within the Town is critical to protecting the natural environment of the Town, the general health and welfare of Town residents, and the local economy.

D. Preservation of the Town’s irreplaceable historic and recreation sites, high-quality agricultural land, air quality and water quality, and priceless and unique character, is of significant value to the year-round inhabitants of the Town, second homeowners and other seasonal residents, and the tourists who visit here.

E. The Town’s rich natural and visual environment is a valuable asset that creates a sense of identity and well-being for residents of the area. Preserving and protecting the scenic and other natural resources of the Town is important for both a healthy environment and vibrant economy. Aesthetic issues are real and evoke strong reactions from people. They deeply affect the way people feel about a place – whether or not seasonal homeowners will choose to retire here, businesses and newcomers will want to locate here, and recreationalists and tourists will want to visit here.

F. Allowing one or more of the Explicitly Prohibited Uses described in § 345-38 of the Local Law to be conducted within the Town would impair the existing character of the Town because, by their very nature, such activities have the potential to produce a combination of negative impacts upon the environment and the health and welfare of the people living in or in proximity to the communities in which they are located. Such negative impacts may include, without limitation, degradation of water quality, degradation of air quality, adverse health impacts, decreased availability of affordable housing, damage to and loss of agricultural lands and soils, damage to and loss of open space, forested areas and scenic views, decreased recreational opportunities, increased truck traffic, noise, vibrations, and fumes, and damage to the tourism industry and second home market.

G. If one or more of the Explicitly Prohibited Uses described in § 345-38 of the Local Law are conducted within the Town, increased traffic generated thereby could be hazardous or inconvenient to the inhabitants of the Town and could be dangerous to pedestrians, cyclists, and motorists. The population of the Town almost doubles during the summer months and many tourists and residents alike walk with children and strollers on roads that lack sidewalks. Even for those in cars, accidents involving heavy trucks
have greater potential for death and serious injury than those involving smaller vehicles. Increased truck traffic may also result in traffic congestion that delays emergency response times for medical emergencies, fires and accidents and constitute a significant disincentive to tourists, visitors and prospective residents. Increased truck traffic increases air pollution and noise levels, and decreases the quality of life and property values for those living nearby. Roads are a critical public resource and constitute a major investment of the public’s money.

H. Allowing one or more of the Explicitly Prohibited Uses described in § 345-38 of the Local Law to be conducted within the Town could negatively impact second home ownership, seasonal home conversions to year-round homes and tourism within the Town, all significant economic drivers of the Town’s economy, and could impair the Town’s ability to attract additional tourism-related businesses.

I. If one or more of the Explicitly Prohibited Uses described in § 345-38 of the Local Law are conducted within the Town, the air pollution, dust and odors generated thereby (whether due to the Explicitly Prohibited Use and/or the truck traffic to and from the proposed site of such activities) could be hazardous or inconvenient to the inhabitants of the Town, particularly pregnant women, infants and children, the elderly, and individuals with chemical sensitivities or respiratory ailments. Air pollution is a known and serious threat to human health and the environment.

J. Allowing one or more of the Explicitly Prohibited Uses described in § 345-38 of the Local Law to be conducted within the Town could negatively impact the quality of water resources within the Town. All of the Town’s residents depend on surface and groundwater for drinking water and a high percentage of Town residents secure their drinking water from unfiltered private wells. If a domestic water source is contaminated, that contamination may not be immediately known causing an exacerbation of the health risk to humans and other receptors. Further, remediation of a contaminated water source is time and cost intensive, and may not restore the water resource to a quality acceptable for domestic use. Water pollution is hazardous to the public health and the environment.

K. If one or more of the Explicitly Prohibited Uses described in § 345-38 of the Local Law are conducted within the Town, additional traffic impacts, noise and light pollution may occur, which are already recognized by the Town and the State of New York to have sufficient environmental impacts so as to need separate regulatory review (See, e.g., Chapter 220 of the Code, §345-21.F, and 6 NYCRR §617.7(c)(1)(i).

L. The creation, generation, keeping, storage or disposal of Hazardous Wastes and/or Natural Gas and/or Petroleum Extraction, Exploration or Production Wastes (as those terms are defined at § 345-38 C. of the Local Law) within the Town could have a negative impact on the public health, safety and welfare of the inhabitants of the Town.

M. The high costs associated with the disposal of Hazardous Wastes and/or Natural Gas and/or Petroleum Extraction, Exploration or Production Wastes (as those terms are defined at § 345-38 C. of the Local Law) have in other localities resulted, and could in
the Town result, in persons seeking to avoid such costs by depositing such material along roadways, in vacant lots, on business sites, in the private dumpsters of others, or in other unauthorized places. Such activities could pose a hazard to the public health, safety, and welfare of the inhabitants of the Town and have a significant negative impact on wildlife habitats.

N. The explicit proscription of the Explicitly Prohibited Uses described in § 345-38 of the Local Law is a legitimate goal of land use laws. There is no question that exclusion of the specified Explicitly Prohibited Uses is a legitimate goal of such laws:

As the United States Supreme Court stated in *Town of Belle Terre v. Borass*, 416 U.S. 1 (1974):

> the concept of public welfare is broad and inclusive…. The values that it represents are spiritual as well as physical, aesthetic as well as monetary. It is within the power of the [local] legislature to determine that the community should be beautiful as well as healthy, spacious as well as clean, well-balanced as well as carefully patrolled. 416 U.S. at 6.

And see also *Matter of Gernatt Asphalt Products, Inc. v. Town of Sardinia*, 87 N.Y. 2d 668 (1996), where the Court of Appeals, New York State’s highest court, evaluated a claim that a town’s prohibition of mining throughout the town was in effect unconstitutional ‘exclusionary zoning,’ and held as follows:

> We have never held, however, that the ... ['exclusionary zoning'] test, which is intended to prevent a municipality from improperly using the zoning power to keep people out, also applies to prevent the exclusion of industrial uses. A municipality is not obliged to permit the exploitation of any and all natural resources within the town as a permitted use if limiting that use is a reasonable exercise of its police power to prevent damage to the rights of others and to promote the interests of the community as a whole. 87 N.Y. 2d at 683, 684. (emphasis added.)

**Section 3. Purposes and Intent.**

The Purposes and Legislative Intent respecting this Local Law are as follows:

A. Purposes. This Local Law is enacted so as to take proactive steps to protect and preserve the quality of the Town’s air and water, high quality physical environments and wildlife habitats, historic and cultural resources, and other assets, to encourage the tourism industry and the second homeowner market, and to protect and promote the health, safety and welfare of the Town and its present
and future residents. Without limiting the generality of the foregoing, this Local Law is intended and is declared by the Town Board to:

(1) promote the health, safety and welfare of the Town, its present and future inhabitants, by protecting them from the adverse public nuisance and/or land use impacts and effects that could result if one or more of the Explicitly Prohibited Uses described in § 345-38 of this Local Law were allowed to be conducted within the Town;

(2) protect the Town’s unique character, the preservation of which is of significant value to the year-round and seasonal inhabitants of the Town and the tourists who visit here, by protecting it from the adverse public nuisance and/or land use impacts and effects that could result if one or more of the Explicitly Prohibited Uses described in § 345-38 of this Local Law were allowed to be conducted within the Town;

(3) preserve the Town’s irreplaceable historic, water quality, air quality, scenic landscapes, tourism sites, and other natural resources, by protecting them from the adverse public nuisance and/or land use impacts and effects that could result if one or more of the Explicitly Prohibited Uses described in § 345-38 of this Local Law were allowed to be conducted within the Town; and

(4) promote the purposes of planning and land use regulation by, among other things, preserving the roads, and fire, police, and other emergency response services in the Town.

B. Declaration of Intent.

(1) Exercise of Police Power. This Local Law is a police power, public nuisance and land use regulation, designed to establish and provide for general land use regulation, environmental protection, public safety, prevention of increased traffic congestion, protection of rural and agricultural resources, preservation of the character of the Town, protection of air quality, protection of water resources quality, prevention of noise and disturbance, protection against diminished property values, and protection of the public from nuisance and/or land use effects and impacts, resulting from the Explicitly Prohibited Uses described in § 345-38 of this Local Law.

(2) Prohibition Against Specified Solid Wastes And Certain Waste Disposal Sites. This Local Law also intends to regulate, in a manner consistent with law, including without limitation, NY ECL § 27-0711, and conducive to the health and welfare of the citizens of the Town, the dumping, discharging, injection and disposal of materials herein defined as “Natural Gas and/or Petroleum Extraction, Exploration or Production Wastes” or “Hazardous Wastes” on lands and in bodies of water within the Town. This Local Law also intends to prohibit, through the exercise of the Town’s authority under applicable law, including without

(3) Protection of Drinking Water Supplies. This Local Law is intended to protect drinking water supplies and is intended to supplement and enhance, and is not intended to impinge upon, the Safe Drinking Water Act and the Underground Injection Control programs administered by the Environmental Protection Agency.

(4) Matters of Local Concern. This Local Law is intended to and is hereby declared to address matters of local concern, and it is declared that it is not the intention of the Town Board to address matters of statewide concern.

(5) Negative Externalities. This Local Law is intended and is hereby declared to impose conditions and restrictions on the use of property that are directly related to and incidental to the use of that property, and such conditions and restrictions are aimed at minimizing or precluding the adverse impact on the Town that could result from an inappropriate use of the property that could otherwise adversely affect the comfort, peace, enjoyment, health and safety of the surrounding land.

(6) Land Use Control. This Local Law is intended to act as and is hereby declared to exercise the permissive “incidental control” by the Town of its police power applied to the area of land use planning and the physical use of land and property within the Town, including the physical externalities associated with certain land uses, such as negative impacts on air and water quality, roadways and traffic congestion and other deleterious impacts on a community. This Law is not intended to regulate the operational processes of any business. This Local Law is a law of general applicability and is intended to promote the interests of the community as a whole.

*****
RESOLUTION OF TOWN BOARD OF THE TOWN OF BETHEL
TO INTRODUCE A LOCAL LAW TO AMEND CHAPTER 345 “ZONING”
OF THE TOWN CODE OF THE TOWN OF BETHEL

WHEREAS, the Town Board of the Town of Bethel (“Town Board”) heretofore adopted a zoning code under the authority of the NY Town Law § 261, which zoning code appears as Chapter 345 of the Town Code of the Town of Bethel (the “Zoning Code”); and

WHEREAS, in December 2006 the Town of Bethel adopted a Comprehensive Plan and Local Law No. 5 of 2006, which although Local Law No. 5 of 2006 implemented certain revisions to the Zoning Code, the Town had not adopted appropriate and necessary Zoning Code revisions and amendments to implement fully the aims, intents and plans embodied in the Comprehensive Plan for certain zoning districts in the Town; and

WHEREAS, the Town subsequently conducted a lengthy review to determine all necessary and appropriate amendments and revisions to the Zoning Code for certain zoning districts; and

WHEREAS, the Town Board then introduced Local Law No. 1 of 2009 to amend the Town’s Zoning Code, and on January 28, 2009 determined that the proposed action was a type I action under the State Environmental Quality Review Act (“SEQRA”), and established itself as lead agency for SEQRA review purposes; and

WHEREAS, the Town Board, acting as lead agency under SEQRA, completed all of its obligations under SEQRA and adopted a Final Generic Environmental Impact Statement on June 9, 2009; and

WHEREAS, Local Law No. 1 of 2009, adopting the amendments to the Zoning Code, was enacted on June 24, 2009; and

WHEREAS, the Town Board subsequently adopted local laws making minor amendments to the Zoning Code as part of its continuing evaluation process of the Zoning Code; and

WHEREAS, the Town Board has been requested to review and address through its land use laws the impacts of the exploration and extraction of natural gas and the impacts of other industrial and manufacturing uses that have potentially negative health and environmental impacts upon the citizens of the Town of Bethel and the natural resources of the Town; and

WHEREAS, the Town has caused to be prepared a comprehensive local land use analysis titled *Land Use Analysis: Hazardous or Natural Gas and/or Petroleum Activities & Industrial Uses*, prepared by Greenplan, Inc. for use in review of the proposed local
law, and a copy of that land use analysis shall be incorporated into the record of these proceedings and shall be made available for public review; and

WHEREAS, in conformance with the Comprehensive Plan, the Town seeks to amend its Zoning Code to take certain preventative measures, including the identification and proscription of Explicitly Prohibited Uses within the Town, which measures are set forth in the local law introduced by this Resolution; and

WHEREAS, this Resolution introduces Local Law No. 1 of 2012, which Local Law is attached hereto, and which, if enacted, will amend Chapter 345 of the Town Code; and

WHEREAS, the action contemplated by this Resolution is subject to the State Environmental Quality Review Act (“SEQRA”) and the Town will seek to act as lead agency for environmental review purposes.

NOW THEREFORE, BE IT RESOLVED, that Local Law No. 1 of 2012 is introduced pursuant to applicable law, including but not limited to §345-64 of the Zoning Code; and be it

FURTHER RESOLVED, that a public information session regarding the elements of Local Law No. 1 of 2012 shall be scheduled for February 22, 2012 at the Dr. Duggan Community Center, which public information session will follow the conclusion of the regularly scheduled meeting of the Town Board held on said date; and be it

FURTHER RESOLVED, that a public hearing on the Local Law shall be scheduled for Thursday, March 15, 2012 at 7:00 PM, which public hearing shall be conducted at the Dr. Duggan Community Center and proper notice of the public hearing shall be given in accordance with §345-66 of the Zoning Code; and be it

FURTHER RESOLVED, that a copy of the introductory Local Law No. 1 of 2012 shall be forwarded to the Town of Bethel Planning Board for its review and recommendation in accordance with Zoning Code §345-65.A; and be it

FURTHER RESOLVED, that a copy of the introductory Local Law No. 1 of 2012 shall be forwarded to the Sullivan County Department of Planning and Environmental Management for review and recommendation in accordance with Zoning Code §345-65.B and New York State General Municipal Law §239-m; and be it

FURTHER RESOLVED, that a copy of the introductory Local Law No. 1 of 2012 shall be forwarded to the Sullivan County Agriculture and Farmland Protection Board for its review and comment; and be it

FURTHER RESOLVED, that the Town Board of the Town of Bethel intends to become lead agency under SEQRA and provide notice of its intent to any other involved agencies; and be it
FURTHER RESOLVED, that the Town Board of the Town of Bethel determines that the proposed action is a type I action under SEQRA regulations with the potential for at least one significant adverse environmental impact and the Town Board needs to analyze said potential significant adverse impacts and evaluate reasonable alternatives thereto as required by 6 NYCRR 617.7; and be it

FURTHER RESOLVED, that the SEQRA materials prepared in support of Local Law No. 1 of 2009 shall be evaluated for recommendation of whether this action may be evaluated by an Environmental Assessment Form or an Environmental Impact Statement and the appropriate document shall be prepared and delivered to the Town Board for review and consideration; and

FURTHER RESOLVED, this Resolution shall become effective when adopted.

Motion by Town Board member Vicky Simpson, seconded by Town Board member Bernie Cohen, and adopted upon a roll call vote as follows:

RESOLUTION OF TOWN BOARD OF THE TOWN OF BETHEL
ADOPTING AN AMENDED FINDINGS STATEMENT UNDER SEQRA
FOR THE ADOPTION OF A LOCAL LAW TO AMEND CHAPTER 345 “ZONING” OF
THE TOWN CODE OF THE TOWN OF BETHEL

WHEREAS, the Town Board of the Town of Bethel (“Town Board”) heretofore adopted a zoning code under the authority of the NY Town Law § 261, which zoning code appears as Chapter 345 of the Town Code of the Town of Bethel (the “Zoning Code”); and

WHEREAS, in 2009 the Town Board introduced Local Law No. 1 of 2009 to amend the Town’s Zoning Code, and on January 28, 2009 determined that the proposed action was a type I action under the State Environmental Quality Review Act (“SEQRA”), and established itself as lead agency for SEQRA review purposes; and

WHEREAS, the Town Board, acting as lead agency under SEQRA, completed all of its obligations under SEQRA and adopted a Final Generic Environmental Impact Statement (“FGEIS”) on June 9, 2009; and

WHEREAS, Local Law No. 1 of 2009, adopting the amendments to the Zoning Code, was enacted on June 24, 2009; and

WHEREAS, on January 25, 2012 the Town Board introduced proposed Local Law No. 1 of 2012 to further amend the Zoning Code, identified the proposed action as a type I action under SEQRA, and resolved to appoint itself lead agency for SEQRA review purposes; and

WHEREAS, the resolution of the Town Board introducing proposed Local Law No. 1 of 2012, provided, in part, that (1) the SEQRA materials prepared in support of Local Law No. 1 of 2009 shall be evaluated for recommendation for the necessary scope of SEQRA review for the current action and (2) the appropriate documents for Town Board for review and consideration shall be prepared and delivered to the Town Board; and

WHEREAS, a long form Environmental Assessment Form (the “EAF”) has been prepared to review the potential for any significant environmental impacts that may result from the adoption of proposed Local Law No. 1 of 2012; and

WHEREAS, in addition to the EAF, the Town has caused to be prepared a comprehensive local land use analysis titled Land Use Analysis: Hazardous Or Natural Gas and/or Petroleum Activities & Industrial Uses, prepared by Greenplan, Inc. for use in review of the proposed local law; and

WHEREAS, on February 22, 2012, the Town Board conducted an information session about proposed Local Law No. 1 of 2012, which information session was duly noticed and open to the public; and

WHEREAS, on March 14, 2012, the Town Board adopted a resolution accepting an EAF prepared in connection with proposed Local Law No. 1 of 2012 and determining the SEQRA
findings statement adopted for the FGEIS, shall be amended in accordance with 6 NYCRR 617.10(d)(2) to address the following issues: (1) the potential for significant environmental impacts if the proposed zoning amendments are adopted as opposed to the potential for significant environmental impacts if the proposed zoning amendments are not adopted and (2) the potential short term and long term economic impacts if the zoning amendments are adopted; and

WHEREAS, commencing on January 25, 2012, the Town Board began accepting written comments to proposed Local Law No. 1 of 2012 and on March 15, 2012, the Town Board conducted a public hearing during which both oral and written comments were presented and received in connection with proposed Local Law No. 1 of 2012 and closed the public hearing on the same date, which concluded the acceptance of further comments, both written and oral; and

WHEREAS, based upon the comments received both prior to and during the public hearing, the EAF prepared for the instant action, review of the FGEIS, and the Findings Statement prepared in connection therewith for Local Law No. 1 of 2009, the Town Board caused to be prepared an Amended Findings Statement to determine whether the amendment of the Town’s current Zoning Code will have any significant impacts on the environment and whether those impacts can be mitigated or avoided; and

WHEREAS, the Amended Findings Statement is attached hereto and incorporated by reference.

NOW THEREFORE, BE IT RESOLVED, that the requirements of 6 NYCRR Part 617 have been met in connection with the adoption of a local law to amend the Zoning Code of the Town of Bethel; and be it

FURTHER RESOLVED, that the Amended Findings Statement of the Town Board of the Town of Bethel is hereby adopted and the certifications contained therein approved; and be it

FURTHER RESOLVED, that the Amended Findings Statement is a positive Findings Statement meaning that the proposed action is approvable after consideration of the FGEIS, which demonstrates that the proposed action is one that minimizes or avoids adverse environmental impacts to the maximum extent practicable; and be it

FURTHER RESOLVED, this Resolution shall become effective when adopted.
