

WARNING:

**THE FRACKING INDUSTRY
WANTS TO CONDUCT
A SEISMIC SURVEY ON YOUR LAND**

YOU DO NOT HAVE TO ALLOW THEM ACCESS TO YOUR PROPERTY

Fracking companies use seismic surveys to identify prime locations for fracking. This process involves the detonation of explosives buried about 25 feet deep.

The survey process can cause property damage, stress, and disruptions in your neighborhood.

Fracking firm Huntley & Huntley hired Geokinetics to survey our area. Earlier this year, Monroeville Council took action to protect residents by **requiring all seismic surveyors to obtain a permit, and provide notice** to residents before conducting surveys on and around private property.

Instead of complying with our sensible laws, Geokinetics fought Monroeville in federal court with lawsuits and intimidation tactics, wasting taxpayer money in the process. Geokinetics also has a history of trespassing on private property, even after being denied access.

WHAT CAN YOU DO ABOUT IT?

These companies do not have any right to access your property or collect data about your property without your express consent.

If you find Geokinetics employees on your property, you should **refuse access**, and **document (with photographs) any activity or damage**.

A Geokinetics employee might offer you a contract allowing them access your property. **The easiest thing to do is to simply say "No thank you!"**

Do not sign any documents.

Signing contracts may impact your property insurance coverage.

Even if Monroeville (or any other governmental agency) has issued a permit, **you are not in any way obligated to allow access to your property.**
